

## PID-80 Gas Intensifier

- Reliable
- Accurate
- Flexible
- User Friendly

The PID-80 Series Intensifier is Alliance's 3rd generation gas booster system, enhanced for even greater reliability and flexibility. The PID-80M can boost the pressure of any inert gas up to 8,000 PSI and is ideal for localized gas assist processing. The system is flexible for high pressure gas supply to multiple gas assist installations, from gas bottles or low to mid-range pressure nitrogen generators.

### Features:

- Compact and portable
- Compatible with any N2 source
- Pneumatically driven-80 PIS min.
- Low maintenance
- Less than 150# system weight
- Remote location capable
- Min. 500 or 100 PSI input pressure
- Integral high pressure nitrogen storage
- Outlet pressure optional to 10,000 PSI
- User friendly

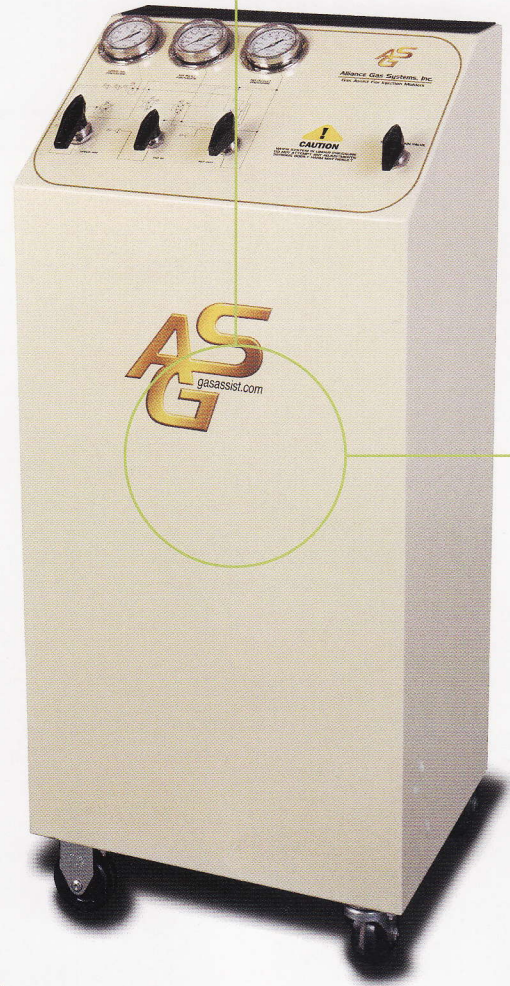

Designed for portability, the **PID-80M** can easily be moved to any location requiring high pressure gas, such as remote processing sites and tryout facilities. The unit is compatible with any **100 to 500 PSI** nitrogen input source.
